Coffee Roaster Survey

Facility Name

Signature of Person Completing Form

Date

Type of roaster: Continuous _____ Batch _____

Pounds of coffee beans roasted per year _____

Control Equipment on Roaster: Thermal Oxidizer _____ Cyclone _____ Fabric Filter _____

Miscellaneous Operations (*please check all that apply*)

- ☐ Destoning
- ☐ Decaffination
- ☐ Equilibration
- ☐ Steam or hot air dryer
- ☐ Spray drying
- ☐ Freeze Drying

Destoning – the process that removes stones, metal fragments, and other waste not removed during the initial screening of the beans.

Decaffination – the process of extracting caffeine from green beans prior to roasting.

Equilibration – after passing through a destoner the beans are conveyed to a hopper where the beans stabilize and dry.
